

Rohan Mehta of Prime Group Gets the Young Entrepreneur of the Year Award

Mr. Rohan Mehta, Managing Director, Prime Electric Ltd., being awarded the Young Entrepreneur of the Year by Shri Kodikunnil Suresh, Minister of State for Labour & Employment, Government of India and Shri Haroon Yusuf, Minister for Power, Food & Civil Supplies, Development, N.C.T of Delhi.

At a glittering event held in New Delhi on 22nd November 2012, Rohan Mehta, Managing Director, Prime Electric Ltd., (PEL), was conferred with the prestigious "Young Entrepreneur of the Year" award. The chief guests of the event were Shri Kodikunnil Suresh, Hon'ble Minister of State for Labour & Employment, Government of India and Shri Haroon Yusuf, Hon'ble Minister Power, Food & Civil Supplies Development, N.C.T of Delhi.

The young, dynamic and zealous Executive Director of Prime Group, Rohan Mehta brings to the table an unmitigated enthusiasm that is as contagious as his smile. Earnest and practical – two of the many values he draws from his father, Padmashree Shri Surinder Mehta who founded the Group – Rohan combines a professional attitude and learning to the Group's technological forays that offer globally advanced solutions conforming to the Group's philosophy of 'looking beyond tomorrow'. An innovator and youth icon, Rohan's inimitable approach has immensely added to the reputation of the Group since his return to India about five years ago after completing his schooling in Switzerland and getting his engineering degree from Oxford.

As Group Executive Director, Rohan looks after engineering, facility development, expansion aspects, and business development of the entire Prime Group. He is also the Managing Director of Prime Electric Ltd., (PEL) a major manufacturing venture of the Prime Group

that he initiated. PEL is a state-of-the art world class extra high voltage power transformer manufacturing facility, rated as one of the best in the country today. The unit is located on 100 acre campus in a SEZ at Naidupet in Nellore, A.P., and has an installed capacity of 10,000 MVA and with a capability to produce EHV transformers upto 765 KV class. The products manufactured by PEL include generator transformers, autotransformers, power plant auxiliary and standby transformers, transformers for substations in the transmission networks and for the industrial enterprises, transformers for DC transmission lines and high-capacity converter substations and special application transformers. PEL is also developing mobile sub-stations upto 132 KV and undertakes complete EPC projects for electrical sub-stations upto 400 KV.

In addition to his other responsibilities, Rohan Mehta is also a Director in Prime Hitech Engineering Ltd., (PHEL) that is also located in the SEZ at Nellore. A very modern engineering unit designed for heavy fabrication and precision machining for the power and energy sector and for manufacture of precision and heavy fabrication of parts for power transformers, manufacture of fabricated and machined parts for steam turbines upto 800 MW currently, the ultra-modern facility is also geared to play a crucial role in the manufacture of special purpose drill bits for oil and for mining applications.

Rohan Mehta also holds the position of Executive Director in PCI Ltd, the flagship company of Prime Group. Prime Group has long been known as a highly diversified group of companies operating on an international plane and providing innovative technology solutions. The Group has interests in five business verticals, namely *Power & Energy, Engineering Products, Manufacturing & Services, Aerospace & Defence, Infrastructure, and Information Technology.*
